WEEK OF 6/27/2016

Week 6/27 Highlight

Principal's Message

Thank you for entrusting your child to inGenius. We are excited to have a fabulous summer of fun and STEAM education and exploration for them.

We hope your child will make new friends, learn new skills and take home some life long memories. We strive to provide your children a safe, focused character building experiences in a beautiful setting with our energetic camper focused teachers and staff. All of our learning experiences are project driven and are designed to allow students to explore new ideas, be creative, have an opportunity to work together and share their work. Student dug into historical mysteries like the Stonehenge and Tge Bermuda Triangle. Our Little Builders were busy making bird feeders out of recycled materials and animal shelters that protect animals from UV rays. Also, students built complex projects using graphic design, electrical engineering techniques to build a light board and and helmets that were inspired by Star Wars.

During our Welcome Time each morning, we continue to build friendships and remember our inGenius expectations: Be Kind, Be Safe & Be Respectful = FUN! Last week, I asked students what made their week fantastic. There were so many stories to share but one student said, "My teacher makes things fun and I didn't know there were so many unsolved mysteries in history." Another student simply said "My teacher is fun and I like my class." The stories could go on and on but I'm delighted that we can bring education and fun together and inspire kids to think and create.

Parents, we still need your help. We are in need board games like checkers and chess. Thanks in advance for your donation!

Again, thank you for being apart of the inGenius family.

Sincerely,
