WEEK OF 7/5/2016

Week 7/5 Highlight

Leadership & Teamwork Training

Principal's Message

Thank you for entrusting your child to inGenius. We are excited to have a fabulous summer of fun and STEAM education and exploration for them.

We hope your child will make new friends, learn new skills and take home some life long memories. We strive to provide your children a safe, focused character building experiences in a beautiful setting with our energetic camper focused teachers and staff. This week was filled with Chess tournaments, exploring outer space, tennis and military style marching just to name a few of our packed week. All of our learning experiences are project driven and are designed to allow students to explore new ideas, be creative, have an opportunity to work together and share their work. This week, students explored the Constitution and historical events, created their own planets and rockets, and challenged each other in fierce but friendly daily chess competition. Tennis Camp was also a hit. Each day our players returned with new skills and greater confidence. We were also honored by Captains Fraizer and Fraizer who shared experiences and taught us about military life and service. It was a pleasure to see such learning activities going on all week along. During our Welcome Time each morning, we continue to build friendships and remember our inGenius expectations: Be Kind, Be Safe & Be Respectful = FUN! Again, thank you for sharing your child and part of your summer with us at inGenius.

Sincerely,

Tami Johnson, MA, PPS
